

Michael Williams – 2003 Cotton Defoliation Test Plots
 Chuck And Kevin Williams Farm - Cochran, GA

Applications made on Oct. 1, Wed. 2003

All Plots 5 Rows wide 50 feet long Flag in 2nd row to Right.
 Flags are at start of plots with plots running North to South.

Note: Plot 5A Had NO treatment on 10/01/03

I plan to make second part of # 5 treatment Only on 5A

Note: Plo # 5 Had 1st treatment only

Folex Pre-
 conditioning 16.00 OZ./AC

Note: Plot 16 & 16A & 16B Had 1st treatment only

DROPP SC 1.07 OZ./AC
 DEF 6.00 OZ./AC

Plot # 14 is tall, I did have the boom drag in about 5 foot of it.
 I had room and product so I put it out again in shorter Cotton Plot # 14A.
 For rating use 14A for test.

Treatment # 21 was added because Bayer had requested to change treatment # 15 for cooler weather.
 I kept # 15 so we could average across locations and added # 21 for Bayer since we had Room.
Treatment # 21 is Finish Pro @24 Oz./Ac. Plus Ginstar @ 5 Oz./Ac.

I Do Plan To made second Part of Treatment # 5 And 16 on Tue.Oct.7th
 I will send notice when Done.
